June 18, 2009

To Honorable Leaders/Representatives Of The United States of America

This letter has been written in regards to a report submitted by the UN's Special Investigator, Philip Alston to the United Nations' Human Rights' Council in Geneva. In his report, <http://www2.ohchr.org/english/bodies/hrcouncil/docs/11session/A.HRC.11.2.Add.5.pdf> He urges that the government ensures that the imposition of the Death Penalty complies with fundamental due process requirements. Mr. Alston also calls for the United States to enact more stringent safeguards to protect the innocent.

As an organization, advocating for prisoners' rights and in alliance with other advocacy groups and organizations, nationwide, we have acquired first hand knowledge of such cases of severe injustice. Furthermore, after reviewing this information, it is obvious that Alabama and Texas are most definitely, two of the worst States, which are very much in violation of such Human Rights' Policies and Treatise and should be investigated.

These States not only encourage such abuses. Moreover, they choose not to address the serious issues of wrongfully convicted Death Row Inmates, illegally executed or tortures/abuses and deprivations. It has been confirmed throughout the years that many innocent men and women have been executed and, that being the case, would mean that we have a multitude of members in this society, who either voted for, or actually participated in the wrongful sentencing and executions of innocent citizens in our communities' nationwide. Where is the justice in that retrospect?

Please review as this is very important information that must be addressed and resolved, in order to hopefully, bring Texas, Alabama and any other non-compliant States in the entire nation of America into compliance with the United Nations, Geneva Convention and the World Court

Respectfully Submitted
